

**K** Knowledge

**S** Occupational skill

**T** Transversal competence

### a) Complete boundary

熟悉支持服务<sup>s</sup>

Support services: retain the complete term.  
Familiarity supplies context.

### b) Separate activities

维护<sup>s</sup> 和 支持服务<sup>s</sup>

Maintenance and support services: two independently meaningful activities.

### c) Shared action

优化曝光与转化率<sup>s</sup>

Optimize exposure and conversion rate: retain one action with both objects.

### d) Contextual type

使用SQL<sup>s</sup> ; SQL原理<sup>κ</sup>

Using SQL denotes skill; SQL principles denote knowledge.

### e) Omitted referent

熟悉Linux基本操作<sup>s</sup> 和 原理<sup>κ</sup>

Basic Linux operations and principles: the second span refers back to Linux without copying it (case 130).

### f) Colloquial capability

会聊天<sup>τ</sup>

Being good at conversation: retain the modal within the capability expression.

### g) Experience scope

大项目售前<sup>s</sup> 经验;

机器人竞赛经验<sup>s</sup>

Presales activities stand without the experience qualifier; robotics-competition experience retains it.

### h) Transversal or technical

客户汇报<sup>τ</sup> ; 接口对接<sup>s</sup>

Client reporting is communication (T); interface integration is a technical operation (S).
