

Chinese SkillSpan SOP-v4 Guidelines (A1, Part II: G8-G15)

Active protocol B.sop_v4.2.9; Jieba never overwrites human-frozen offsets.

Rule ID	Operational decision	Chinese example
G8	Return no span for procedures, public notices, benefits, locations, schedules, company text, slogans, appearance/health requirements, year counts, or irrelevant driving licences.	五险一金、体检通知、5年以上工作经验 -> 空标注 []。
G9	Exclude generic modifiers. Experience is normally framing: strip 经验 when the remaining industry expression is complete; retain it only if removal changes identity or type, and log the exception.	大项目售前经验 -> 大项目售前[S]; 本科及以上学历 -> 本科及以上学历[K]。
G10	Language names, levels, and language examinations/certificates are L. Complete education qualifications and non-language professional certifications are K.	英语六级[L]; 本科及以上学历[K]; ISO 27001[K]。
G11	Tools are context-dependent: job use -> bare-name S; course/theory/foundation/syntax -> complete knowledge-phrase K. If unresolved, use S and log adjudication_required.	使用SQL -> SQL[S]; 了解SQL原理 -> SQL原理[K]。
G12	Communication/reporting are T even inside duties. Tool-, method-, or occupation-bound abilities are S; transferable abilities are T. Actions may be S, but outcomes/KPIs are not spans.	客户汇报[T]; 编码能力[S]; 科研能力[T]; 保证流量增长 -> []。
G13	Never use L>S>K>T. Resolve boundaries and types separately with pairwise tests. If type remains unresolved, assign S and record both candidates and adjudication_required.	成对检验仍分不开 -> S + adjudication_required; 不得写成 ESCO 总序。
G14	Use zero-based, end-exclusive character offsets in the original sentence. Human-frozen offsets are authoritative; BIO and CWS-aligned views are derived artifacts.	校验: sentence[start:end] 必须与 span 完全一致; Jieba 不得自动覆盖人工 Gold。
G15	For potentially overlapping mentions, separate independent spans when possible. Otherwise keep one context-licensed primary label, log the alternative and overlap type, and adjudicate unresolved cases. Crossing spans are prohibited.	同边界多标签、嵌套或交叉候选进入重叠审计; 主 Gold 只保留仲裁后的单一扁平标签。
